

COMPLIANCE MANAGEMENT

Seneca will provide access to you through our proprietary compliance manager software while we manage your compliance for you. As the owner/operator of your facility, you will always have exclusive rights to any and all data associated with your site(s). Data is stored off-site at a secure location on professional data storage servers, and the data is backed up on a daily basis.

Additional services available on a time and materials basis include:

- EPA Tier 2 Reporting for AST sites.
- 24-hour emergency communications network to environmental managers.
- Review and consulting associated with property transfer liability.
- Seneca Service calls to resolve ATG alarms or other UST maintenance issues.

What can Seneca Companies' Compliance Management Services provide?

Gather

- Inventory all UST system equipment in database.
- Establish site specific testing requirements.
- Develop calendar of events for compliance.
- Physically/remotely collect monthly leak detection tests.
- Establish connectivity to store - if equipped with TCP/IP card.

Consult

- Advise on risks associated with property transfers.
- Store level staff training available on as-needed basis.
- Manage subcontractors for petroleum service, compliance testing and LUST work/reimbursement.
- New regulation education and planning.

Audit

- Set up site-specific ATG instructions.
- Audit monthly leak detection tests required by state/federal regulations.
- Work with facilities to obtain passing leak detection tests.
- Identify/order required annual tests (function tests, CP recertification, tank lining, etc.)
- Complete regulatory filings (annual tank registration, financial responsibility/insurance, tank tag renewal, compliance verifications, etc.)

The Complete Solution

Store

- Digital copies of all compliance documents.
- Supply documentation to appropriate regulatory agency following inspections/requests.
- 24/7 client access to Compliance Manager Database.

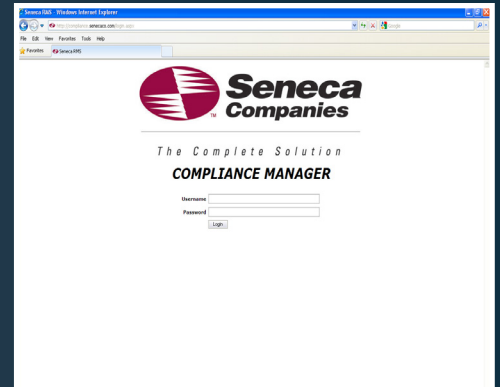

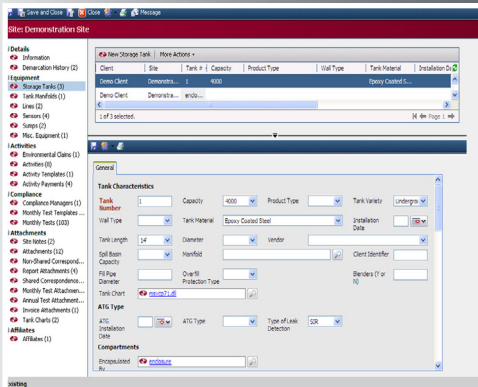

Extract

- Notify client of missing or non-passing monthly and annual leak detection tests.
- UST equipment portfolio planning.
- LUST liability reporting.
- Customizable on-demand reports.

Resolve

- Liaise with regulators or private insurance companies.
- Correct deficiencies and NOV from periodic inspections.
- Spill reporting and notification to regulators and/or insurance companies.

If you have your own UST/AST compliance management procedures and staff in place, Seneca's Compliance Manager Software can help you self manage your own leak detection records and compliance issues. Our highly automated, fully-programmable software allows for the scheduling and tracking of all necessary tests and activities to keep your fueling systems in compliance.
