FORECOURT SOLUTIONS

Monitor, manage & optimize your operations with one dashboard.

- 24/7 visibility of your site's performance and tools.
- Improve customer experience with immediate site information.
- Increase uptime and reduce service costs.
- Diagnose, troubleshoot and resolve more than half of your issues without requiring a dispatch.
- Avoid fines and NOV's with industry leading compliance & document management software.
- Remote software upgrades to keep current with EMV software updates.
- Remote representative to monitor and troubleshoot any issues.
- PCI compliance made easy with asset tracking.
- Electronic warranty tracking for serialized equipment.
- Reduces Total Cost of Ownership (TCO).

IMPROVE UPTIME

Information is power. Having 24/7 visibility of your site's performance and tools to troubleshoot and resolve dispenser issues remotely could give you the edge you need to outperform your competitors. Forecourt360 has created a cloud-based solution that will reduce your Total Cost of Ownership (TCO), increase your uptime and elevate the customer experience. Forecourt360's cloud-based service allows subscribers to remotely connect to their dispensers and perform several straightforward and complex tasks.

FORECOURT360 PROVIDES YOU WITH THE FOLLOWING FEATURES:

Remote Management – With Forecourt360, every c-store owner can remotely resolve as high as 30% of the most common issues in minutes. That means you can get your forecourt running without the added maintenance costs of a site visit.

Performance Monitoring – Real-time visibility of your entire network enables you to take action before your customers discover a problem. By monitoring your equipment's performance metrics, you can evaluate your site's health and predict potential issues (e.g., like analyzing flow rates) that may arise.

Asset Management – One less task to do in the day is one less worry. That is why Forecourt360 has provided an automating feature for recording your secure asset information and change history. By alleviating the cumbersome responsibility of reporting for PCI requirements, you can run your c-store efficiently and can always remotely review this information at any time.

Security – In a time where criminal activity is still a threat to c-stores, safety is no joke. That is why with Forecourt360 provides enhanced security measures so that when unauthorized entry is attempted, you will not only be alerted immediately but will also have the ability to automate a dispenser shutdown.
