Seneca Waste Solutions – opens new branch location in Wisconsin

(DES MOINES, IA – September 30, 2022) – Seneca Waste Solution’s Division takes great pleasure in announcing the opening of our new field service branch in Eau Claire, Wisconsin in order to cater to the increasing demands of our c-store and commercial fueling and emergency generator customers in the Wisconsin and Minnesota regions.

“Our customers spoke and we listened. Seneca’s expansion north will allow us to more efficiently serve those customers that need a timelier response and heightened attention to their needs. Our expansion in fuel restoration services throughout the US will continue to develop further and grow,” said Chris Biellier, VP of Environmental Services, Waste Solutions & Strategic Partnerships.

Services currently being provided are fuel quality and restoration services for underground and aboveground fuel storage systems at retail, commercial, municipal, governmental, financial, hospital and education facilities. This expansion has been made possible by the expanding support and continued interest on the solutions we provide as it pertains to fuel quality issues faced by our customers. We promise to maintain the same quality of service and deliver everything that our patrons need.
